Virtual Spring Camp

APRIL 20-23

Hello Campers!

We hope you find that these activities are interesting, challenging, and will be something to talk about with your friends or family. We're going to try cool experiments, check out the great outdoors, and use our resources wisely.

Virtual Spring Camp goes a little like this: Each day campers will participate in various "camp" activities designed to earn badges and keep them active during the extended school break. We will post camp activities on our social media that the girls can do at home using supplies that may be readily available to them. We encourage you to share your virtual spring camp experience and activities on social media with the hashtag #gsoutdoors. At the end of camp, girls will be eligible to order a Virtual Spring Camp patch. All activities can be scaled up or down to accommodate younger and older girls.

Who's ready? Let's do this!

Virtual Spring Camp

DAY 2

ROLL CALL

Let us know you will be participating today! You can comment or send in a picture of your Girl Scout ready for her camp day. It will be exciting to know who your fellow campers are but not required to participate.

FIELD TRIP

Check out some animal habitats and observe animals at [the National Zoo](#). They have animal cams for lions, pandas, elephants and naked mole rats. Find out about different nocturnal animals. (Brownie-Animal Habitats, Junior-Night Owl, Daisy-5 Flowers, 4 Stories, 3 Cheers for Animals)

CANTEEN

Try your hand at baking. [Here's a simple recipe for making turnovers](#). Best of all, you can add whatever healthy filling you like to make a delicious breakfast or snack with only five ingredients. Daisy girls can create this simple recipe (with help) to deliver to someone for a nice breakfast in bed. (Daisy-Considerate and Caring, Brownie-Snacks, Juniors-Simple Meals)

COMPUTER LAB

Use this simple [ASICS code](#) to spell out the words Girl Scouts in different color crayons. You can also use different colored beads and string to create a bracelet with your name or initials. Remember that computers recognize only 1s and 0s so choose only two colors. One to represent the 1s and one to represent the 0s. (Daisy-Coding for Good 1, Brownie-Coding for Good 1, Junior Coding for Good 1)

NATURE OBSERVATION

Time to check out the sky. In the morning, take a piece of white paper and lay it on a hard surface outside. Place a small toy in the middle of the paper and trace the shadow it makes. Hint: Plastic horses or other animals work well for this. Come back in the middle of the day and trace the shadow again. Come back a few hours later and trace the shadow once more. How is the shadow different at each time of day? (Daisy-Space Science Explorer)

EVENING OBSERVATION

Take a few minutes to observe the night sky. Can you find the moon? Do you see pictures in the stars? See if you can find out the names of some of the constellations. [Here's a video](#) to help you identify the constellations. (Daisy-Space Science Explorer, Brownie- Space Science Adventurer, Junior-Space Science Investigator)
